

# *Emergency Readiness*

**Portable - Self powered - UL Rated**

## **Critical Fuel Support – When Communities Need It Most**

When storms hit and the electrical grid fails, fuel becomes one of the most critical resources for emergency response. Police cruisers, ambulances, fire trucks, generators, and emergency equipment all depend on reliable fuel access to keep communities safe.

### **Stations designed to support:**

- Police & patrol vehicles – EMS & ambulance – Fire departments
- Emergency generators – Public works equipment – Disaster relief teams

Fuel 1 Micro Stations are strategically located at retail and commercial partner locations throughout communities, creating a distributed fueling network that can support both daily operations and emergency response.

Fuel 1 Micro Stations are designed to be portable and rapidly deployable. Because these stations are installed at partner retail locations, Fuel 1 retains the operational ability to transport and redeploy stations to areas where emergency fuel support is most needed.

### **Specifications:**

- 500-gallon tank
- Lockable pump/equipment cabinet – Heavy duty skid base with forklift pockets
- EMT Fitting and Pipe Liquid Sealed
- Battery Box EX Rated Group 24 Deep
- Link2Pump UL Rated EX control panel.
- Pressure/vacuum venting
- 15 GPM Fill-Rite Transfer Pump Package: Includes dispensing hose and automatic nozzle EX Rated – Automatic fueling nozzle, no spill
- Lockable Equipment Cabinet: Equipment and ports are secured, and spills are contained – Secure hose access enables fueling while cabinet is locked
- Double Walled 110% Containment: Built-in, weatherproof secondary containment eliminates the need for pans or basins. Self Contained certified.
- Removable Inner Tank: For routine cleaning, maintenance and inspection
- UL142 RATED with UL2085 Adaptations for Gasoline Approved: Widely recognized standard for safety for above ground tanks in North America
- Design Approvals: UL142, CAN/ULC-S601, NFPA
- Dual Vent Atmospheric Vents JME HCVVA802 39" Tall 2" Wide per code.
- On a Heavy-Duty Double Axel Trailer. Completely Portable.
